

HCL Domino

40% of the Fortune 500 Is Powered by Domino. Here's Why.

At HCL Software, we believe that continuing with Domino makes sense from a commercial, technical and security perspective. As a leader, renewing Domino lets you focus your time and resources on your high priority digital transformation projects.

Built for the Future

Because of our leadership and an investment of \$1.8B by HCL Software, we have a strong, future-proof roadmap and available HCL Domino skills. With three major recent releases, today's Domino is modern, mobile, and cloud-ready. With low-code capabilities there is no rush to move off the platform.

Proven and Powerful

Many organizations have tried to switch their apps to Outsystems, Microsoft or Mendix and found that it's hard, expensive and time-consuming. Instead, HCL's approach to modernization is proven, and Domino should be a key component of your digital transformation plans. HCL can help you avoid spending millions of dollars on risky re-platforming, and you can easily deliver modern user experiences and integrate with your systems of choice.

“Since HCL purchased Domino/Notes (from IBM), the rate and quantity of significant improvements and enhancements to Domino/Notes has been nothing short of miraculous!”

— Mike B., via G2 Crowd

The World is Powered by Domino

Domino Powers 40% of the Fortune 500.

Domino powers 10 million enterprise-grade apps that run 15,000+ companies around the world.

“ With Domino v12 I believe that the CIO can bring best of breed to the table... I find it to be a foundational platform that allows organization to readily mix and match generations of IT for organizations that wish to move into the future. ”

- Dion Hinchcliffe, Constellation Research

Rock-solid Secure Platform to Power Your Business Apps.

Trusted by banks, governments, utilities, and insurance companies worldwide and has never been hacked

“ One of the principal reasons we are still with Domino is its security. In more than 20 years, we have NEVER had a security issue. ”

- Oscar Lara, CIO of BioPappel

300+ Enterprise Companies Last Year Renewed Domino.

These customers (and over 500K active users) realized they couldn't find a secure platform with the kind of value Domino provides.

“ The TCO to use, develop, and maintain our full business environment with standard ERP/HRM/ PM solutions from Microsoft, SAP, Salesforce would have been 15X the cost of Domino. ”

- Bernd Gewehr, Head of IT at Vössing

Trusted by Global Leaders

3 Reasons for a Multi-Year Renewal

Your Data Privacy is Your Reputation

Domino provides a rock-solid platform to power your business apps that's second to none. This platform has been trusted by banks, governments, utilities, and insurance companies worldwide for the last three decades.

- Enjoy the highest levels of security and data privacy
- Cloud native, or on-premises — the power of choice

Your Budget Will Thank You

Compared to bringing in a new app dev platform, the total cost of ownership including licensing and operational costs of continuing with Domino is lower than traditional app dev or low-code platforms. Plus, you get:

- Better-looking apps with your branding on browsers and mobile devices for less
- Lower support costs by no longer needing Notes on the desktop
- Secure, low-code citizen development for about \$1 per user per month*
- Unlimited applications for one price and predictable subscription pricing
- Industry-proven application development platform for workflow-based apps

You Can Sleep Easier

Three major new versions of Domino in the last three years (with more to come) means you can work with HCL (or a Business Partner) to upgrade to the latest release in hours and days:

- As a Microsoft Ecosystem partner, HCL embraces heterogeneous integration to make your IT landscape simpler, e.g., Active Directory synchronization
- Cloud-agnostic, fully containerized and works with your Kubernetes and cloud backup vendors of choice
- Integration with enterprise apps such as SAP, REST end points, and SaaS apps
- Skilled resources from HCL or our Business Partners

As CIOs tell us, HCL's investment in Domino means that staying with the platform is a smart decision. Let us tell you more, and why renewing for three years makes financial sense, too.
