

The Cloud Native Solution Factory for Enterprise Software

HCL SoFy enables you to deploy your HCL Software products to any cloud – public, private, or hybrid – in minutes. SoFy solutions are portable across all Kubernetes environments so you have complete freedom of choice. HCL SoFy uses Helm technology to provide HCL product components and Rest API endpoints as cloud-ready building blocks.

Capabilities

Benefits

Faster Time to Value

Take deployment time from days and hours to minutes – a 90% reduction in initial deployment time

Lower Cost of Deployment and Management

Move to the cloud with HCL SoFy and realize a 70% reduction in maintenance time

Automatic Software Updates

Start using new software capabilities as updates become available, retain ownership of your data and implementation, and avoid cloud lock-in

Easy Access to 50 Product Components. 2,000+ REST API Endpoints

Install on Kubernetes in less than an hour – no experience needed – and manage your infrastructure easier and more cost effectively than traditional methods. Simplify customization and integration of apps through APIs and minimize disruptions with proactive use of containerization

Easy Access to Product containers

The HCL cloud native repository in SoFy – enables CI/CD automation. HCL Software does software distribution the cloud native way

Move to a Cloud Native Architecture Today

HCL SoFy allows you to deploy your software anywhere, gives you the power to innovate, and flexibility to scale. Get started with HCL SoFy today and manage your HCL Software products on the cloud of your choice.

Join us in our journey – together – into the future with HCL Now.
