

LICENSE INFORMATION

The Programs listed below are licensed under the following terms and conditions in addition to those of the HCL Master License Agreement.

Program Name: HCL Enterprise Integrator for Domino 9.0.1

Program Number: 5724-L76

As described in the HCL Master License Agreement("MLA") and this License Information, HCL grants Licensee a limited right to use the Program. This right is limited to the level of Authorized Use, such as a Processor Value Unit ("PVU"), a Value Unit ("VU"), or other specified level of use, paid for by Licensee as evidenced in the Proof of Entitlement. Licensee's use may also be limited to a specified machine, or only as a Supporting Program, or subject to other restrictions. As Licensee has not paid for all of the economic value of the Program, no other use is permitted without the payment of additional fees. In addition, as stated in the HCL Master License Agreement, Licensee is not authorized to use the Program to provide commercial IT services to any third party, to provide commercial hosting or timesharing, or to sublicense, rent, or lease the Program unless expressly provided for in the applicable agreements under which Licensee obtains authorizations to use the Program. Additional rights may be available to Licensee subject to the payment of additional fees or under different or supplementary terms. HCL reserves the right to determine whether to make such additional rights available to Licensee.

Program's specifications can be found in the collective Description and Technical Information sections of the Program's Announcement Letters.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the Program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by Processor Vendor, Brand, Type and Model Number at http://www.HCL.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html) and the number of processors made available to the Program. HCL continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the Program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the Program, except for those servers from

which the Program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the Program, as defined according to the Virtualization Capacity License Counting Rules at http://www.HCL.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html.

* An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Program-unique Terms

Licensee is not required to obtain license entitlements for an installation of the Program for (a) failover recovery and (b) for a concurrently run Program on a second computer used for development and test purposes.
