

HCL OneTest Performance

Identify, manage, and eliminate application performance problems

Quickly execute performance tests that analyze the impact of load on applications and validate the scalability of web and server-based applications.

Benefits & Value

Improve Quality: Yield higher quality products via fast, comprehensive testing that is optimized for development environments.

Manage Capacity: Determine if hardware or production configurations need to be improved before going live.

Create Quick Functional Flows: Ensure each transaction is executed as quickly as needed.

Accommodate Business Needs: Check systems for speed, scalability, and stability.

Capabilities

Capture and track business SLAs in test plans.

Create realistic user workloads that exercise key business transactions.

Automatically deploy the environment and schedule execution of workloads.

Integrate with HCL OneTest Data for on-demand synthetic test data generation.

Communicate results and areas of non-compliance to stakeholders.
