Benefits

Details

Designed for Windows desktop

It is a native Windows 64-bit application which is designed to run on the latest releases of Windows operating environments. The product is tested with each release of Windows updates to ensure users continue to have reliable access to host systems.

Adheres to the latest security standards

Supports the latest security standards (Transport Layer Security 1.2 with FIPS) to ensure most secured connection to your host systems.

Supports extensive languages

Supports the Emulator High Level Language APIs (EHLLAPIS) to support automation of repetitive tasks.

Meets organization's requisites

ZIE for Windows is a proven emulator solution which can meet the requirements of most demanding organizations around the world.

Easy licensing options

Flexible license option and simple license management helps to simplify ongoing maintenance and license compliance.
