

# HCL Sametime Premium

## Your meeting. Your data. Double the value.

HCL Sametime is what regulated industries and government entities use to ensure their most important communications in their digital workplace are secure. It's a proven and trusted video meetings platform with persistent chat, rebuilt for how today's organizations are working — nimbly, securely, and remotely — all while halving operational costs.

### Your Meeting.

Feature	Benefits	Business Value
Setting up, scheduling and running a meeting is easy.	Get work done faster. Collaborate with your teams more easily with meeting features for users and moderators.	Pay only for the meetings features employees need to be productive. Less training and help desk support required.
Join a meeting safely from your car or motorcycle.	Control your meeting experience using your vehicle's infotainment system using Apple CarPlay or Android Auto. Read chat messages and dictate new ones hands-free with Siri.	Stay safe, productive and participate from anywhere, anytime.
Double the value with three meeting solutions in one.	Live-stream global team meetings, host interactive lecture-style events, or conduct everyday small team meetings.	Save money. No need for separate live-streaming, event and team meeting and chat solutions.

### Your Data.

Feature	Benefits	Business Value
Rock-solid data privacy, encryption and auditability.	Since your Sametime deployment is unique to you, your meetings are protected. Add an additional layer of security with the preview of our end-to-end encryption for your most private internal meetings.	Protect your organization's investments, and your reputation with the level of security and data privacy from your company's own video meeting service.
Deploy on a secure private cloud or on-premises 80% faster.	Faster deployment with containers and auto scale with Kubernetes; installs with fewer servers.	Automation saves time on configuration and administration, lowering TCO.
Set admin policies and manage resources the way you want in minutes.	It's easy to define the policies you want to protect your company's confidential information and privacy.	Regulated or risk-averse enterprises have more supervision and control over data privacy and resources.

# HCL Sametime Premium

Your Digital Workplace.

Feature	Benefits	Business Value
Speed up your projects, with uninterrupted collaboration.	Project teams can continue the conversation after the meeting has ended using a persistent workspace with chat, pinned conversations, and video recording.	Anyone at any time can catch up on the action items and conversations that matter to their goals.
Tailor and schedule your meeting in your calendar in 30 seconds or less.	Create or customize the type of video meeting you want when you schedule it in Microsoft Outlook. You are not restricted in the number of unique meeting configurations, the plug-in does it all.	Optimize your meeting experience to your team's needs using your email and calendar client of choice.
Get started faster, start your meeting with one click.	No need to wait for software to install or update. As long as your browser is up-to-date, you're set.	Meetings are instantaneous, no time wasted in joining any meeting from your desktop or mobile or vehicle.

**Note:** Sametime Premium contains a preview of end-to-end encryption for internal video meetings. This preview uses server negotiated key mechanisms.
