

# HCL Clara

## An Intelligent Virtual Assistant for Workload Automation

### Overview

Workload Automation enables organizations to gain complete visibility and control over attended and unattended workloads. HCL Clara, an Intelligent Virtual Assistant, understands human input, provides answers by tapping into a rich, specialized knowledge base, and allows direct interaction with Workload Automation in natural language to execute tasks. Clara saves IT ops time, frees up the schedulers, manages the how-to questions and initiates the initial troubleshooting of Workload Automation conveniently with voice command or simple text chat.

### Capabilities

Enterprises depend on Workload Automation to manage critical business processes, while reducing operating costs. IT Operators ensure Workload Automation operation continuity 24x7, avoiding involvement of support team, Application support teams want to quickly solve issues in their applications to ensure business continuity. Clara makes Workload Automation even easier to use, by offering a conversational interface to scheduling users, access the company's automation knowledge base, providing recommendations and performing tasks for the end-users.

- Interactions in natural language
- Easy and intuitive training modules
- Intuitive conversation definition via UI
- Voice recognition
- Action script and external language support for integration
- External Interface for third party integration
- Robust AI/NLP based intent identification engine
- Autonomous execution of tasks in asynchronous way
- Push notification

#### **Pluggable/customizable knowledge base:**

- HCL Knowledge base with regular updates
- Possibility to customize the knowledge based on customer needs

#### **Actions & runbook implementation leveraging product APIs:**

- Clara leverages HCL Software product APIs to enable users to automate business processes and troubleshoot problems

## Benefits

Clara offers a human-like, personalized, round-the-clock experience to Workload Automation users, which will:

- Minimize the FAQ-type calls
- Speed up learning curve on new features
- Reduce common-issue repetitive incidents
