# HCL Domino Volt

Build Enterprise Apps Lightning Fast.

HCL Domino Volt is your solution for citizen developers to build powerful, secure, and enterprise-grade applications on the proven Domino platform. With no specialized IT skills required, you can empower your business users to build applications for document management, secure audit compliance and more. Extend your Domino investment today with Domino Volt.

Build Apps up to 70% Faster.

Meet the ever-changing needs of your business, whether departmental or mission-critical, faster with Domino Volt's drag and drop tools and reusable components. You get low-code tools with built-in scalability, reliability, and security.

No Specialized IT or Domino Skills Required.

All business users are empowered to build new apps without the need for specialized skills — putting power into the hands of those closest to the business, and saving time and IT resources.

Extend Your Domino Investment.

Your Domino investment goes further when you build apps that run on your existing infrastructure and integrate with your Domino apps, and are protected by the same security and governance that Domino has always guaranteed.

HCL Domino Volt

Key Features and Benefits

Features	Benefits
Create Apps from Spreadsheets in Minutes	Improve efficiency of email file sharing with a central app that provides the forms, views and access controls you need to securely get work done.
Works with Domino Apps and Data	Extend and enhance the value of your Domino apps by building new apps that interact with their data and agents.
Integrate with Anything	New HCL Link capabilities let IT define and manage connections for Domino Volt designers to build into their apps. Examples include SAP, Salesforce, ServiceNow, REST, ODATA, JDBC and many more.
Automate Processes with Workflow	Define document workflows down to the user level to determine who gets assigned, notified, what they see and can do, what connections are called and who get alerts when the process is complete.
Build with Style	The style editor lets business developers customize the look of their apps without having to know CSS.
Built-in IT Governance	IT admin controls include defining who can create and use apps, what types and sizes of files can be added, which services and integrations are allowed, as well as the ability to sandbox the use of JavaScript.

Try Domino Volt Today

The sandbox allows you to get a feel for Domino Volt in a web browser — no installation needed! Create a sandbox account and start building apps with Domino Volt today. View sample apps, training tutorials, videos, and be a part of the community forum.
