

# HCL Sametime Premium

## Your Meetings. Your Data. Double the Value.

HCL Sametime is enterprise-grade secure video meetings and chat—built cloud-native. Your confidentiality is protected and Sametime delivers double the value, with lower TCO.

### Customize Your Meeting Experience

Tailor your meeting experience for yourself, your team, your partners, and customers.

### Make Good Security Decisions, Every Time

Ensure your privacy is protected with meeting modes, member management, and end-to-end encryption.

### Lower the TCO of Your Meetings

Try our cloud-native solution that's easy to deploy and operate secure and private meetings at scale.

Starting at **\$1/user\***

\*For Domino CCB customers, + infrastructure cost.

## Key Features and Benefits

### Features

### Benefits

**Data privacy, auditability, and compliance.**

Secure your meeting's privacy and protect your organization's data. Add an additional, optional layer of security with E2E encryption

**Admin controls and meeting monitoring tools.**

Keep track of attendance, chats, and more with auto-generated meetings reports. Enhance meeting security and control access with a waiting room, enforced member management, and password-protected meetings.

**Deployment choice: On-prem and private cloud.**

Deploy 80% faster on Vanilla or managed Kubernetes platforms — installs with fewer servers, gives you complete control over your deployment.

**Meeting modes: Restricted meetings, member management with a waiting room option.**

Select your meeting mode — confidential, collaboration, or lecture-style.

**Personalized, branded, and customizable experience.**

Make your meeting your own with customizable branding and personal preferences. After the meeting, switch to a 1:1 click-to-call video or audio conversation.

**Robust meetings with embedded persistent chat.**

Full-featured meetings and chat — organize and recall your conversations later to enhance productivity. Elevate any chat to a meeting at any time.
